

WHY FORTE?

One on one support

Every Forte student receives individual support. Every session is private and customized to meet their specific needs. No group sessions here!

Organized curriculum with adaptability

Students follow a tried and true curriculum to keep them organized and on track. No missed deadlines or opportunities due to missing requirements. That being said, each student is unique and we understand that. Our curriculum can be adapted to best serve students based on their learning & work styles.

Student-driven process

Our students are given the space they need to work through the college admissions process with honesty, vulnerability, confidence and the authority to make decisions - important life skills to practice!

Student Ownership

As a student-driven process, we expect to see students take ownership and initiative. Completing assignments on time, communicating effectively & doing their own work are the keys to success.

Parent support

Just because we practice a student-centered approach, doesn't mean parents are not involved. We provide parents with milestone meetings, a resource dashboard that compliments the students' work and meeting summaries after every session. Parents are always welcome to attend meetings or schedule their own as well.

Tech tools

Forte uses a Google platform - google docs, spreadsheets and gmail. Students are already familiar with Google so this makes easy work of onboarding. No need to learn a whole new system! We also use Calendly for scheduling and Zoom for virtual meetings.

Toolbox

Helpful college admissions planning tools such as a personalized College Companion, Corsava, College Kickstart, College Aid Pro and a robust resource dashboard are used during our time together.
