
DEADGLOW

Sync Licensing Electronic Press Kit

Artist Overview

DeadGlow is a cinematic alternative rock and sonic studio project blending post-hardcore intensity, electronic textures, emo revival, and atmospheric lo-fi soundscapes.

The project operates as both a **creative band identity** and a **production studio catalog**, delivering music designed for emotional storytelling across film, television, streaming series, video games, trailers, and digital media.

DeadGlow's catalog spans multiple sonic worlds:

- High-energy post-hardcore anthems
- emotionally driven pop-punk
- industrial and cyberpunk rock
- atmospheric lo-fi environments
- video-game-inspired electronic scoring

This versatility allows the DeadGlow catalog to serve a wide range of sync needs from **action sequences and anime-style battles to emotional drama and ambient storytelling**.

All DeadGlow recordings are **one-stop licensed**, meaning the project controls **100% of both master and publishing rights**, simplifying the licensing process for supervisors and production teams.

Top Sync-Ready Tracks
